## OVERVIEW

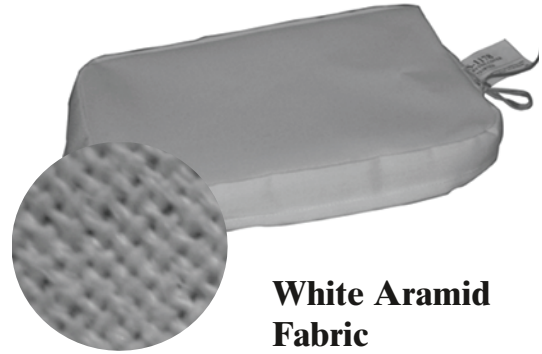

**USE CTRL+F FUNCTION TO FAST SEARCH**

Buckeye Pads and Covers has been manufacturing tailor made laundry press pads and covers for over 50 years. We use blueprints, supplied by the original equipment manufacturers (OEM's), to assure a proper fit and the highest quality finish. All Buckeye laundry covers are constructed with a three-dimensional skirted design, to provide a custom fit for each machine. We also offer different material and flannel combinations to satisfy every possible pressing need.

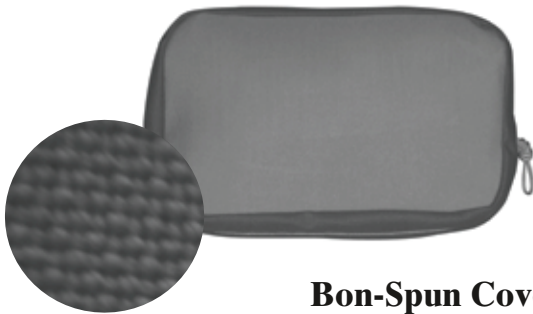

### **Bon-Pak Cover/Pad Combo**

The Bon-Pak Cover/Pad Combo is the ultimate for pressing on flatbed presses. The Bon-Pak consists of a Bon-Twill double warp nylon cover, and a 50 ounce Bonn-E-Blue nylon flannel sewn together for a quick and easy installation. This pad and cover combo will provide an outstanding performance as well as an extended life span.

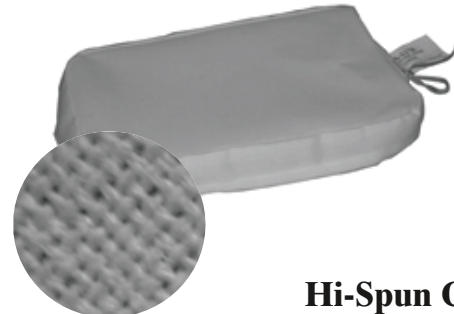

### **White Aramid Fabric**

White Aramid cover cloth is a versatile fabric with many dry cleaning and laundry applications. The material has the needed flexibility to produce a superior finish. It has the breathability for timely drying, and the durability that provides extended cover life. This material is a requirement for many of the Asian pressing machines now available.

### **Bon-Spun Cover**

The Bon-Spun Cover cloth is spun nylon. This essential cover material is used for laundry flatbed presses and some body bosom applications. Bon-Spun has a high thread count that allows for a tight weave, which will not transfer to the finished garments. The closeness of the weave makes the material more durable and gives Bon-Spun a smooth finish. Because of the spun construction, the fabric also provides the non-slip surface required on body bosom, collar and cuff, and flatbed presses.

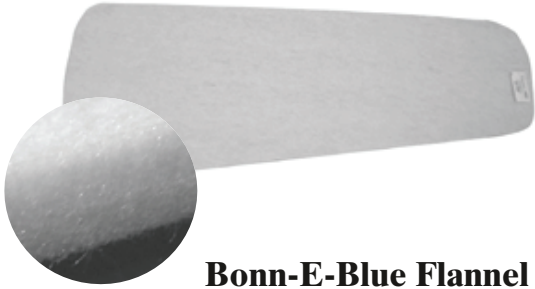

### **Hi-Spun Cover**

Buckeye's Hi-Spun Cover is made from our most durable cover material. This high quality aramid fabric will withstand high heat temperatures, and is a must on electric presses. The combination of heat resistance and high tensile strength makes for a cover material that provides long lasting performance. Used primarily on the laundry side, Hi-Spun has several dry cleaning applications such as ironing boards, etc.

## OVERVIEW, CONTINUED

---

### **Bonn-E-Blue Flannel**

Bonn-E-Blue Flannel is a double-faced, needle-punched, nylon flannel padding. Made from virgin nylon fibers, Bonn-E-Blue has a high density that makes it withstand compression and provides long lasting performance. It is recommended for many cabinet body bosom presses as well as being ideal for use on collars and cuffs and all flatbed presses. Bonn-E-Blue is available in 50-, 30-, and 20-ounce weights.

“SPRING LOADED” yoke air bag prevents flattening of the bag during dressing of the unit. This design allows maximum yoke bag expansion throughout the additional drying time so vital for a better yoke finish.

Texsteel steel base pads provide resiliency and dissipate moisture producing a smooth crisp finish, eliminating button breakage.
